School of Applied Agriculture, Food and Natural Resources

Mission

The School of Applied Agriculture, Food and Natural Resources is dedicated to cultivating innovative leaders and sustainable practices that enhance the agricultural and food industries. We commit to fostering an inclusive and equitable learning environment, bridging academic knowledge with real-world application and empowering emerging farmers and diverse communities. Through collaboration, research and outreach, we aim to drive positive change, support regional economic vitality and promote stewardship of natural resources in Minnesota and the Upper Midwest.

Vision

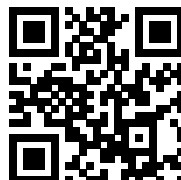

To be a leading hub of innovation and excellence in agriculture and food systems, where diverse students and communities thrive through transformative education, collaborative research, and sustainable practices that address the challenges of our world.
